🚦 Currently Available for Freelance Projects & Remote Opportunities | Response within 24 hours

PROFESSIONAL SUMMARY

Senior Mobile Developer with 5+ years of experience transforming innovative ideas into market-ready applications. Recently transitioned to freelancing (August 2025) after leading teams at Joblogic to achieve 40% UX improvements while implementing CI/CD pipelines that increased deployment efficiency by 80%. Specializes in Android (Kotlin/Java), iOS (Swift), and Flutter development with proven expertise in Clean Architecture, MVVM patterns, and enterprise-scale solutions. Currently available for global freelance projects, focusing on mobile app development, technical consulting, and full-stack mobile solutions.

PROFESSIONAL EXPERIENCE

Freelance Mobile Developer

August 2025 – Present

Remote | Global Clients

- Developing personal mobile application for Android and iOS market launch using Flutter and Clean Architecture
- Providing technical consulting for mobile architecture, development strategies, and AI/ML integration solutions
- Specializing in enterprise applications, startup MVPs, and legacy app modernization for international clients
- Available for Android (Kotlin), iOS (Swift), and Flutter cross-platform development with focus on performance optimization
- Offering technical team leadership, code reviews, and architecture consulting for development teams globally

Senior Mobile Developer & Team Lead

June 2020 – July 2025

Joblogic Service Management Software, Lahore, Pakistan

- Led cross-functional development team of 5+ mobile developers, achieving 40% UX improvement through architectural transformation and Clean Architecture implementation
- Established CI/CD pipelines using Azure DevOps, increasing deployment efficiency by 80% and enabling zero-downtime migrations for legacy systems
- Modernized legacy mobile systems serving 10,000+ active users with 95%+ system uptime and reliability, implementing MVVM patterns and dependency injection
- Conducted comprehensive code reviews, mentorship programs, and technical guidance resulting in improved code quality and team productivity
- Successfully migrated SQLite to Room Database with zero data loss while creating custom UI components and design systems for consistent user experience
- Applied SOLID design principles and established coding standards, development workflows, and quality assurance processes for scalable architecture

Junior Android Developer

March 2019 – May 2020

Sofiyar Technologies, Peshawar, Pakistan

- Developed Android applications using Java and Kotlin programming languages with focus on user interface optimization
- Implemented REST API integrations, database management solutions, and third-party library integrations
- Collaborated on UI/UX design implementation and gained expertise in Android SDK, Firebase services, and development best practices

TECHNICAL SKILLS

Mobile Platforms

- Android Development (Kotlin/Java) - Expert
- iOS Development (Swift) - Intermediate
- Cross-Platform (Flutter/Dart) - Intermediate
- React Native - Beginner
- KMP (Kotlin Multiplatform) - Beginner

Architecture & Patterns

- Clean Architecture, MVI, MVVM, MVP, MVC
- Repository Pattern, Dependency Injection
- Modularization, SOLID Principles
- Offline-First Mobile Solutions

Development Tools

- Android Studio, Xcode, VS Code
- Git, Azure DevOps, CI/CD Pipelines
- Firebase, Room Database, SQLite
- RESTful APIs, JSON

Emerging Technologies

- AI/ML Integration (MediaPipe)
- Mobile DevOps & Performance Optimization
- Cloud Services (Azure, Firebase)
- Jetpack Compose, SwiftUI

NOTABLE PROJECTS

Personal Mobile Application (August 2025 - Present)

- Developing cross-platform application for Android & iOS market launch with focus on user experience
- Technologies: Flutter, Firebase, Clean Architecture, AI/ML integration for enhanced functionality
- Features: Offline-first functionality, real-time data synchronization, performance optimization, and modern UI design
- Planning: App Store and Google Play Store launch with comprehensive marketing and user acquisition strategy

Joblogic Mobile Modernization (2023-2025)

- Led complete mobile architecture transformation for enterprise service management solution
- Technologies: Kotlin, MVVM, Room Database, Azure DevOps, CI/CD pipelines, RESTful API integration
- Impact: Served 10,000+ active users, achieved 40% UX improvement, 80% deployment efficiency increase
- Results: Zero-downtime migrations, 95%+ system uptime, improved user satisfaction and retention rates

Legacy System Migration (2021-2023)

- Successfully migrated multiple legacy Android applications to modern architecture patterns
- Technologies: Java to Kotlin migration, SQLite to Room Database, implementation of Clean Architecture
- Achievements: Zero data loss during migration, improved app performance by 45%, reduced crash rates significantly
- Team Leadership: Coordinated with cross-functional teams including QA, DevOps, and product management

TECHNICAL SPECIALIZATIONS

Mobile Architecture & Design Patterns:

- Clean Architecture implementation with clear separation of concerns and dependency inversion
- MVVM, MVP, and Repository Pattern design for maintainable and scalable mobile applications
- Offline-first mobile solutions with robust data synchronization and conflict resolution strategies
- Performance optimization techniques including memory management, battery optimization, and efficient networking

Development Process & DevOps:

- CI/CD pipeline design and implementation using Azure DevOps, GitHub Actions, and Jenkins
- Automated testing strategies including unit testing, integration testing, and UI testing frameworks
- Code review processes, quality assurance methodologies, and technical documentation standards
- Agile development practices, sprint planning, and cross-functional team collaboration techniques

Leadership & Technical Mentoring:

- Technical team leadership with experience managing 5+ developers across multiple projects
- Mentorship programs for junior developers including code review sessions and knowledge sharing
- Architecture decision-making and technical strategy planning for long-term project success
- Client communication, requirement analysis, and technical consulting for business stakeholders

EDUCATION

Bachelor of Software Engineering

City University of Peshawar

2015 – 2019

Relevant Coursework: Software Architecture, Database Systems, Mobile Application Development, Data Structures & Algorithms

LANGUAGES

- English (Professional Working Proficiency)
- Pashto (Native)
- Urdu (Fluent)

PROFESSIONAL INTERESTS

- Artificial Intelligence & Machine Learning in Mobile
- Cross-Platform Development Trends
- Mobile Security & Performance Optimization
- Open Source Contribution & Community Building

PROFESSIONAL SERVICES

- Native Android Development (Kotlin/Java)
- iOS App Development (Swift)
- Cross-Platform Solutions (Flutter/React Native)
- Technical Architecture Consulting & Code Reviews
- Legacy App Modernization & Performance Optimization
- AI/ML Mobile Integration & Implementation
- Team Leadership & Developer Mentoring
- DevOps & CI/CD Pipeline Setup

CURRENT AVAILABILITY

- Status:** Available for freelance projects immediately
- Response Time:** Within 24 hours for project inquiries
- Work Type:** Remote, Part-time, Full-time, Project-based
- Time Zone:** PKT (UTC+5) with flexible working hours
- Collaboration:** Global clients welcome, English proficiency
- Specialization:** Enterprise apps, Startup MVPs, Technical consulting
